PROJECTS

November 2023 - Present

Personal Portfolio

- Developed a responsive portfolio website to showcase my projects.
- **Tools and Technologies:** Figma, Git, HTML, CSS, Javascript.

October 2023 - Present

Workout Log

- Created a personalized workout log for tracking fitness progress. Users can log exercise details, including weight and sets, customize workout days, and add new exercises. The application provides a list of exercises tailored to selected muscle groups, fostering a user-friendly experience. This project not only addresses the shortcomings of existing workout logging apps but also showcases my skills in web development and innovation.
- **Tools and Technologies:** Figma, Git, HTML, CSS, Javascript.

March 2023 - May 2023

Serotonin - A Clothing E-commerce Website

- Developed a responsive clothing e-commerce website, incorporating intuitive navigation, product categorization, and a checkout system.
- **Tools and Technologies:** Figma, Git, HTML, CSS, Javascript, PHP and MySQL.

March 2023 - July 2023

Sustainable Spoonful - A Food Saver Application

- A mobile application designed to address concerns related to food wastage by providing individuals, businesses, and stores the opportunity to sell items at a discounted price.
- **Tools and Technologies:** Figma, Git, Java, XAML, and SQL Server.

March 2022 - October 2022

Scholar Space - Hack Jam Entry

- ScholarSpace came in 3rd place. This application is a hub for students to find internships/vacation-work or part-time jobs related to their qualification of study and for recruiters to find students to hire.
- **Tools and Technologies:** Angular, Firebase, JavaScript, TypeScript, HTML, and CSS.
